

TECHNOLOGIES LIMITED

Layered for Safety, Engineered for Life.

Company Profile

About Us.

PMO Technologies Ltd is a Kenyan manufacturer and supplier of high-quality Personal Protective Equipment (PPE), dedicated to safeguarding lives across healthcare, industrial, commercial, and community environments.

We specialize in the manufacture of high-quality KN95, N95 FFP2 particulate respirator masks that meet international standards, ensuring safety, health, and productivity in medical facilities, laboratories, industries, and communities. Our masks meet NIOSH 42 CFR 84 N95 requirements for a minimum 95% filtration efficiency and EN 149:2001 rated - FFP2 rating. We also source and supply of premium hand and foot protection solutions designed to meet the evolving safety needs of modern workplaces.

Driven by innovation, quality, and reliability, PMO Technologies combines advanced manufacturing processes, stringent quality control systems, and customer-focused service delivery to provide dependable safety solutions that protect people and empower industries. Our products are trusted by healthcare facilities, laboratories, manufacturers, construction companies, institutions, and organizations seeking reliable protection solutions that meet both local and international standards.

At PMO Technologies, safety is not just a product — it is our commitment.

Mission & Vision.

MISSION

Our mission is to manufacture and supply high-quality personal protection equipment that meets international standards, ensuring safety, health, and productivity in medical facilities, laboratories, industries, and communities.

VISION

To be a leading and trusted provider of world-class respiratory protection solutions in Africa and beyond, safeguarding lives and supporting industries through innovation, quality, and sustainability

Our Philosophy.

We believe that health, safety, and human well-being are fundamental pillars of sustainable development and industrial growth. Every product we design and every partnership we build is guided by our commitment to delivering protection solutions that improve lives and strengthen industries. Our philosophy is built on four key principles:

QUALITY EXCELLENCE

We are committed to delivering products that consistently meet the highest standards of safety, performance, reliability, and regulatory compliance through rigorous quality assurance processes.

INNOVATION & SUSTAINABILITY

We continuously embrace advanced technologies, modern manufacturing systems, and sustainable practices to develop efficient, future-ready safety solutions for diverse industries and communities.

CUSTOMER-CENTERED SOLUTIONS

We prioritize understanding our clients' operational needs and safety challenges in order to provide dependable, customized, and cost-effective protection solutions.

INTEGRITY & RESPONSIBILITY

We uphold ethical business practices, transparency, accountability, and social responsibility in everything we do while contributing positively to national development and workplace safety.

Our Product Portfolio

PMO Technologies provides high-performance Personal Protective Equipment (PPE) through locally manufactured and internationally sourced product lines designed to meet diverse workplace safety requirements.

Our product portfolio includes:

Respiratory Protection

Engineered for superior filtration efficiency, comfort, durability, and dependable respiratory safety.

- SGW N95 FFP2 Particulate Respirator Mask
- SGW KN95 FFP2 Flat Fold Respirator Mask

Hand Protection

A comprehensive range of industrial and safety gloves designed for precision handling, chemical protection, cut resistance, durability, and user comfort.

- PVC Dotted Cotton Gloves
- 13G Polyester Nitrile Coated Gloves
- Latex Chemical Resistant Gloves
- Nitrile Cut Resistant Gloves
- Polyurethane Cut Resistant Gloves
- Polyester Latex Coated Gloves
- Welding Gloves

Foot Protection

Durable industrial safety footwear designed for high-risk environments requiring impact, puncture, heat, chemical, and slip resistance.

Built to international safety standards, our products deliver reliable performance where protection matters most.

Respiratory Protection

SGW KN95 FFP2 Flat Fold Respirator Mask

This mask is designed to provide superior breathability, comfort, and high-efficiency filtration across healthcare, industrial, commercial, and public health environments.

Its compact flat-fold design, soft multi-layer fabric structure, and secure nose bridge ensure enhanced comfort and fit during extended use.

Key Features

- *High filtration efficiency*
- *Comfortable flat-fold design*
- *Secure nose bridge for improved fit*
- *Lightweight and breathable construction*
- *Suitable for prolonged wear*
- *Available in customized branding options*

SGW N95 / FFP2 Particulate Respirator Mask

This mask delivers premium respiratory protection against harmful airborne particles in medical, industrial, laboratory, and high-exposure environments.

Engineered with advanced five-layer filtration technology, adjustable or fixed head straps, and a soft inner lining, the mask provides both comfort and dependable protection during prolonged use.

Key Features

- *Five-layer filtration system*
- *Fluid-resistant outer layer*
- *Adjustable and fixed-strap options*
- *Durable nose clip for secure fitting*
- *Ultrasonic assembly technology*
- *High breathing efficiency and comfort*

The respirator complies with NIOSH 42 CFR 84, EN 149:2001 FFP2, and KS 2636:2021 standards.

PVC Dotted Cotton Gloves

Lightweight and versatile gloves designed for general handling operations in dry working environments. Manufactured using a polyester-cotton blend with single-side PVC dots, these gloves provide enhanced grip and handling comfort for packaging, warehouse, and light industrial applications.

Applications

- Warehousing
- Packaging
- Material handling
- General industrial tasks

Polyurethane Cut Resistant Gloves

Seamless 13-gauge HPPE gloves designed for high cut resistance with lightweight flexibility and excellent tactile sensitivity. The PU-coated palm provides secure grip and enhanced abrasion resistance for precision work environments.

Applications

- Precision handling
- Assembly work
- Engineering operations
- Industrial manufacturing

13G Polyester Nitrile Coated Gloves

Durable industrial gloves featuring a 13-gauge polyester liner with nitrile-coated palms for improved abrasion resistance, grip, and comfort.

Applications

- Mechanical handling
- Assembly work
- Industrial operations
- General maintenance

Polyester Latex Coated Gloves

Designed with a 13-gauge polyester liner and latex crinkle-coated palm for superior grip, flexibility, and durability when handling rough or textured materials.

Applications

- Construction
- Landscaping
- Warehousing
- General industrial handling

Nitrile Cut Resistant Gloves

High-performance safety gloves engineered for exceptional cut, abrasion, and puncture resistance while maintaining excellent dexterity. Manufactured using HPPE fiber with durable nitrile palm coating and certified to EN388: 4X43D.

Applications

- Metal fabrication
- Glass handling
- Precision assembly
- Industrial operations

Welding Gloves

Premium welding gloves manufactured from AB-grade cowhide split leather and reinforced with Kevlar stitching for superior heat and mechanical protection.

Applications

- Welding
- Metal fabrication
- Heavy industrial work
- High-heat environments

Latex Chemical Resistant Gloves

Heavy-duty gloves manufactured from 100% natural latex to provide excellent resistance against diluted acids, alkalis, and a wide range of chemicals.

Applications

- Cleaning operations
- Chemical handling
- Laboratories
- Sanitation services

Foot Protection

Built for peak performance in high-risk environments, these boots combine uncompromising protection with all-day comfort.

Key Features

- **Dual-Layer Armor:** Integrated Steel Toe Cap and Steel Mid Plate for impact and puncture resistance.
- **Hazard Resistant:** Specialized outsole is Oil, Acid, Alkali, and Heat Resistant for extreme conditions.
- **Superior Stability:** Features a Non-Slip Toe design to ensure traction on difficult surfaces.
- **Premium Build:** Crafted from durable Original Leather for long-lasting quality and breathability.
- **Ergonomic Comfort:** Designed with an Extra Comfort system to reduce fatigue during long shifts.

Our Commitment.

At PMO Technologies Limited, we are committed to delivering high-quality respiratory protection products on time, every time. We understand the critical importance of safety in healthcare, industry, and community use, and we strive to be a dependable partner that our customers can always trust.

Our promise is simple:

Reliable Quality

Every product is manufactured under strict quality controls and complies with international standards.

Timely Delivery

We value your time and ensure prompt supply to meet your needs without delays.

Customer Satisfaction

Your safety and trust drive our continuous improvement and innovation.
